Greetings,

Summit Medical Compassion Center has received several inquiries from the local medical community looking to expand their knowledge base on medical marijuana.

Recognizing the fact that many facilities are still uncertain of how they feel about cannabis as medicine, we thought it might be a good idea to initiate a dialogue between local physicians/providers about who we are and how medical cannabis is helping our patients.

If you or your colleagues are interested in meeting with our team to learn more about medical cannabis, or get your questions answered, we would be happy to either visit you at your office or we could schedule a time when you could come into our facility for an educational conversation.

We are working on bridging the gap between local medical professionals and the industry itself so that you can have the information to share with your patients in the event they inquire about medical cannabis.

We are here for you as a resource and willing to assist you in any way possible.

*Regards,  
Janet G. Kupris*
